Summery

I am a computer science professional passionate about deep learning and machine learning. I have expertise in engineering solutions in these fields. I enjoy exploring data-driven solutions and leveraging analytical techniques to uncover insights. I aim to deepen my expertise in data analysis and contribute to innovative projects.

EDUCATION

BNU(Benha National University)	Cairo, Egypt	Computer Science, Major: AI	Oct 2022 - July 2026
--------------------------------	--------------	-----------------------------	----------------------

Undergraduate Coursework: Machine learning; Database programming; Data Engineering & Visualization; Data structures & Algorithms; Deep Learning, Natural Language Processing, Software Engineering, Statistics, Neural Networks, computer Networks **GPA:**3.79

TECHNICAL EXPERIENCE

Projects:

Auto correction system (2025): Designed and implemented a natural language processing system to automatically correct spelling and grammar errors using Transformer models and custom tokenization strategies.

Q/A chatbot (2025): Developed a Question-answer chatbot capable of understanding user queries and providing accurate, context-aware responses using NLP techniques. Implemented with a focus on intent recognition, entity extraction, and response generation, leveraging machine learning models and/or pre-trained transformers to ensure natural interaction and high accuracy.

Facial recognition model with CNN (2024): Developed a deep learning model using convolutional neural networks (CNNs) for facial recognition and identity verification, handling image preprocessing and feature extraction.

An-animal-segmentation-model-with-u-net-and-tf (2024): Built an animal segmentation model using the U-Net architecture with TensorFlow to accurately identify and segment animal regions in images. The project involved preprocessing annotated datasets, training a deep convolutional network for pixel-wise classification, and evaluating performance using metrics like IoU and Dice coefficient.

Certificates :

Machine Learning Specialization	Andrew Ng
Deep Learning Specialization	Andrew Ng
Hugging Face Agents Course	

Programming Languages: C++, Python

Development Tools and Environments: Visual Studio Code, GitHub, Pytorch, Tensorflow, Hugging face, gradio, weight & biases, LangChaing, LangGraph, Smolagents, LlamaIndex, LangFuse

Data Science Skills: Statistical Analysis, Machine Learning, Data Visualization.

Deep Learning Techniques: Transfer Learning, CNN, RNN, LLMs, Transformers
